

Conni®

We have continence covered

Continence Management Support

Many people experience bladder control problems at some stage of their life. It can affect men, women and children of all ages.

There are various ways of managing this condition to enable you to live the life you love! We recommend you consult with your doctor, continence nurse/clinic or physiotherapist to understand options that may be helpful such as exercise, diet and fluid intake or perhaps even medication.

The most common type of leakage is called stress incontinence. This is the loss of small amounts of urine during physical movement such as coughing, sneezing, laughing or exercising. Sometimes after certain types of surgery this condition may be experienced.

Our innovative range of re-usable products will assist in managing all types of incontinence in a discreet, comfortable and cost-effective way.

The Conni Story

Conni has been Australia's leading brand of re-usable incontinence management products for more than 15 years. Our team has a collective of 60 plus years experience in the design and manufacture of technical textiles and the supply and management of major brand products into the world market.

Incorporating Conni, Conni Kids, Conni Critters and Pick-Pocket: Galway Trading's global distribution includes Europe, United States, Canada, New Zealand, Southeast Asia, Central America and Japan. Our products are used in commercial laundries, aged care facilities, hospitals, the hospitality industry and in the home.

The Conni range was developed in response to consumer demand and we proudly declare our products free of PVC, latex and formaldehyde. We are recommended by health care professionals and have been evaluated and selected for numerous Australian Government health contracts. This is a testament to our quality, innovation and service.

Our Mission

Conni is committed to value and reliability. We are sensitive about incontinence and promise to deliver innovative products to meet the changing needs of our valued customers.

It is with integrity and pride that Conni continues to develop high quality products that are functional and cost effective.

Protecting our Environment

Our company maintains an ongoing commitment to produce environmentally sustainable products. Conni products are manufactured in modern efficient factories that adhere to the Sedex social compliance accreditation. We minimize unnecessary transport wherever possible and all of our packaging is either recyclable or re-usable.

Safety in Textiles

Oeko-Tex certification indicates products which have been tested for harmful substances. If all components of a textile comply with the requirements of the Oeko-Tex criteria catalogue without exception, the textile manufacturer receives certification and is entitled to use the Oeko-Tex logo to identify products.

In order to ensure ongoing compliance with the test criteria, the authorised Oeko-Tex Institute carries out control tests every year. Therefore, the Oeko-Tex label is your best proof for the safety of textile products.

Bed Pads

Conni absorbent and waterproof bed pads assist in the management of incontinence, bedwetting and excessive perspiration.

Rest well at night with the combined comfort and protection of a soft stay-dry top layer, slim absorbent core and waterproof breathable backing.
